Summary

B.Sc. IT graduate with hands-on professional experience in Python Django backend development and React.js frontend development. Currently contributing to two live production systems at Elink Software Technologies: building the complete React.js frontend for MahaVastra — a multi-role e-commerce platform (25+ components, REST API integration, RBAC dashboards for Buyers, Sellers, and Admins) — and developing Python Django RESTful APIs with PostgreSQL backend for the ELINKJAL-NRW water distribution management system. Proficient in JavaScript, Python, Django REST Framework, REST APIs, and SQL. Actively leverages AI tools (GitHub Copilot, ChatGPT, Claude) to accelerate delivery. Seeking roles as a Python Django Developer, React.js Developer, or Full Stack Developer.

Technical Skills

Frontend	React.js, HTML5, CSS3, Bootstrap	**Backend**	Django, DRF, Flask, FastAPI
Languages	Python, JavaScript (ES6+)	**Databases**	PostgreSQL, MySQL, SQLite3
API & Testing	REST API, Postman, Thunder Client, Ajax	**Version Control**	Git, GitHub
Concepts	RBAC, JWT, OAuth, OOPs, CRUD, React Router, JSON Handling, Responsive Design	**AI Tools**	GitHub Copilot, ChatGPT, Claude

Professional Experience

Elink Software Technologies — Bandra, Mumbai
Python Developer | React.js Frontend Developer — *Oct 2024 – Present*

MahaVastra Multi-Role E-Commerce Platform

- Tech Stack: React.js, JavaScript, HTML5, CSS3, REST API, React Router
- Sole frontend developer for a multi-role e-commerce platform serving Buyers, Sellers, and Admins using React.js.
- Architected and built 25+ responsive components including product listing, product details, shopping cart, checkout, order tracking, and authentication flows.
- Implemented Role-Based Access Control (RBAC) using React Router, dynamically rendering separate dashboards for Admin, Seller, and Buyer roles post-login.
- Integrated REST APIs to fetch and display product, category, cart, user, and order data with proper loading, error, and empty state handling.
- Built a real-time cart sync system using browser Custom Events to update the Navbar badge without a global state library.
- Implemented product search, multi-filter (category, fabric type), and pagination via API query parameters and controlled React state.
- Developed KYC document upload and verification flow for seller onboarding.
- Built reusable component library (modals, sidebars, navbars, form inputs), reducing code duplication across the platform.
- Integrated Google Translate widget supporting 13 Indian regional languages.
- Collaborated with Spring Boot backend team on API contract design and data integration.

ELINKJAL-NRW Water Distribution Management System

- Tech Stack: Python, Django, Django REST Framework, PostgreSQL, JavaScript, Ajax, HTML5, CSS3
- Built and maintained a full-stack web application for Non-Revenue Water (NRW) monitoring and water distribution management.
- Developed RESTful APIs using Django REST Framework for seamless frontend–backend data exchange.
- Implemented Django ORM-based backend logic for efficient storage and retrieval of water supply, usage, and leakage data across districts.
- Used JavaScript and Ajax for dynamic UI updates and asynchronous data loading without full page reloads.
- Designed and optimized complex PostgreSQL queries for large-scale water distribution datasets, improving query performance.
- Conducted unit testing, debugging, and performance optimization to ensure system stability in production.
- Collaborated with cross-functional teams, gathered requirements, and provided post-deployment support and maintenance.

Education

Nirmala Memorial Foundation College, Mumbai
Bachelor of Science in Information Technology (B.Sc. IT) *Aug 2021 – May 2025*

- CGPA: 7.0 / 10

Projects

Shopee — Full-Stack E-Commerce Web Application | github.com/dhiru9136/Shopeeproject 2024 – 2025

- Tech Stack: Python, Django, HTML5, CSS3, Bootstrap, SQLite3
- Developed a feature-complete e-commerce web application with user authentication, product listing, shopping cart, and checkout functionality.
- Designed and implemented an admin dashboard with full CRUD operations for product and order management.
- Managed all database operations using Django ORM for efficient and optimized data handling.
- Built a fully responsive UI with Bootstrap, delivering a smooth end-to-end user experience.
